

Southwinds Policy: Requirements for Heavy Equipment in Bowl Area

Effective immediately:

To protect the landscape and hardscape of the Southwinds campus, any vendor bringing heavy equipment/lifts onto the property must first check in and be cleared for entry at the Guard House.

Before allowing access beyond the front gate, the guard on duty will notify on-site staff to ensure the route to be taken by this heavy equipment is accessible for this vendor on that day, and ensure there will be no conflict with other equipment or scheduled work that day.

The guard must call to announce the vendor and obtain approval for their entry to Southwinds in the following order BEFORE opening the gate:

1. Marty (772) 766-3484
2. Rahshaud (772) 321-5148

Additionally, for access to the bowl area:

- 1.) **Ballon tires only allowed in bowl area.**
- 2.) If the path needed involves crossing or traveling on the cement sidewalk areas, **protective underlayment must be in place by SW staff before entry into those areas is allowed from the parking lot.**

Approved and adopted by SW BOD on January 21, 2025.

(as of 1/21/2025)
